Dental Excellence Study Club
Crown Council

I have been working with Techniques Dental Lab for over a year. The work that they produce has consistently been of the highest quality and on time. The entire lab team has always been quick to answer any questions and take the time to make sure everything has been completed as desired. The lab owner, Mike, has made himself very available for questions or concerns, and our patients that have gone to see him for custom shades have always come back with a positive experience and a beautiful crown.

I could not ask for anything more from a dental lab and am confident that others will feel the same way. The Techniques Dental Lab team has proven themselves to produce a great end product combined with excellent customer service.

Sincerely

John M. Segnini DDS
